L3: Entry 1 of 13

File: USPT

Feb 3, 2004

DOCUMENT-IDENTIFIER: US 6687742 B1

TITLE: Communication control method for electronic mail system

Detailed Description Text (9):

FIG. 2 is a block diagram illustrating the structure of each of the Internet facsimiles 3, 6, 7 and 8 which transmit and receive an image in the form of an e-mail. A CPU (Central Processing Unit) 21 constitutes the body of the control section. Stored in a ROM (Read Only Memory) 22 are an operation program for the CPU 21 to control the individual sections and various kinds of setting data. A RAM (Random Access Memory) 23 temporarily stores various kinds of data that the CPU 21 needs in executing various processes. The CPU 21 operates to perform the general control of the individual sections of this Internet facsimile based on the operation program stored in the ROM 22, thereby permitting the Internet facsimile to accomplish the designed functions.
